CHALLENGES

Serious shortage of human resources

- + Almost all of the 14 subsystems are suffering from lack of human resources.
- + We are exploring all avenues trying to get funds, to expand collaborations and to devise an efficient way.
- + We put too much emphasis on recruiting highly experienced researchers who immediately fit in everyday development activities.
- + We should be patient enough to start with on-the-job-training of young guys brilliant but with little or no experience.

Extremely tight schedule

- + Our discussions on the Roadmap have been prone to idealism.
- + The risk management has sometimes been misplaced in our discussions.
