Status

Name	Number we have in ICRR	comment
Stepping motor	0	The delivery time is 2.5 month. The company said this works at 4K. We have ordered.
Pico motor	1	We had a cooling test using a PT cooler. But it did not work below 200K.
Autex	0	Salesmen from Autex show us a motor (PZT). But they said they don't have experience at 10K. They will give us a sample for cooling test. And they will search a stage for cryo.

We are calculating a rough requirement. (accuracy and dynamic range)

Test of actuator for initial alignment in cryogenic temperature A/I

- We are calculating a rough requirement. (accuracy and dynamic range)
- We will make a test stage for Stepping motor.
 - ▶ We have to consider the connection point between the motor we ordered and this stage. (We don't have the stage now. The stage which VI group have is made by a Italian company.)
- We have to consider the rotate component is.

Status

PD: We tested 2 PDs at low temperature.

LED: Cooling test is not yet.

PD

Name	Type	Peak	Number we have in ICRR	comment
S1223-01	Si PIN PD	960 nm	5	We had a cooling test. Efficiency decreases at low T (37%)
G8370-01	InGaAs PIN PD	1550 nm	0	Tomaru-san said this works at low T. I asked a quotation but it was out of stock.
FGA21	InGaAs Pin PD	1600 nm	2	The quantum efficiency decreases at low T(15%).

LED

Name	Type	Peak	Number we have in ICRR	comment
OP232	GaAlAs	890 nm	5	This is used in OSEM at room temperature.
L2656-03	GaAlAs	890 nm	0	Tomaru-san said this works at low T. I asked a quotation.
ML925B45F	InGaAsP	1550 nm	2	

Liquid nitrogen test: 77K

OP232	Does not work
ML925B45F	Works!

Detect by sensor card

Test of Displacement sensor and actuators (OSEM) in cryogenic temperature A/I

- Search other PD and LED. (Manu is in process.)
- Test LEDs we have in 77K and cryostat.
- Calculate the noise from the data we have now.

Other

- Is really the fiber 30cm? (Baffle...)
