

Institute-base shift

Current shift system

- **Total requests: 280 person-days (19 requests)**
- **Total number of shifts: 250 person-days**
- **Visitors program call: 2 persons x 6 wks**
- **Visitors program participants: 7 persons**
- **In '15 Aug-Dec, 3 persons/wk is needed in average**

Current system is working well, but we are not sure if we can have enough shifts during the installation.

➡ Proposal of the institute-base shift

Institute-based shift as a back-up

- We keep the current system but add this one as a back-up in the case we cannot find people
- For example, we call for a shift 1.5 months before the work, if TM cannot find shifts TM can ask an institute leader to send someone 1 month before the work
- An institute with 5+ members is expected to make a contribution at least once a year (1-2: 1/4yr, 3-4: 1/2yr, 5-9: 1/yr, 10+: 2/yr)

Pros and cons

- **Practically it is easier to gather people**
- **People may get more conscious about the necessity**

- **Less time for subsystems to schedule a shift**
- **People may feel it rather compulsory**
- **There is no return for the participating institute**
(the right to join the congress?)
