

Hazardous event report

I found	an incident / a near-misses.	<input checked="" type="checkbox"/>
	a hazard.	<input type="checkbox"/>
	an accident.	<input type="checkbox"/>

Location: <p style="text-align: center;">Center of the KAGRA site.</p>	Date: <p style="text-align: center;">2015/Nov/13</p>	Analyst: <p style="text-align: center;">R.Takahashi</p>
Task description: <p style="text-align: center;">The PR2 assembly work.</p>		
Event description: <p style="text-align: center;">Dropped tools several times.</p>		
What is the keyword to express the event that you found? <p style="text-align: center;">Drop of tools</p>		

Fault Tree Analysis:

Probability:

Sensible expression	Frequent 頻発する	Probable しばしば発生する	Occasional 時々発生する	Remote 起こりそうにない	Improbable まず起こり得ない	Incredible 考えられない
Points	0.1	0.01	0.001	0.0001	0.00001	0.000001

Risk Control:

The risk reduction measure that I suggest is ...

We do not work at the same time up and down. For the reason we call out each other.
 We use the gloves which does not slip.
 We wear the helmets for the clean rooms.
 We take a break once at an hour.
