#### **Detector Characterization**

# Kazuhiro Hayama On behalf of DET subsystem

## Human Resources, Cooperation

- Chair : Hayama
- Active members on software development :

Yamamoto, Yuzurihara, Ueno, Miyamoto (OCU), Itoh (RESCEU)

Measurement of environment :

**KAGRA members + ERI +OCU** 

## **Current Tasks**

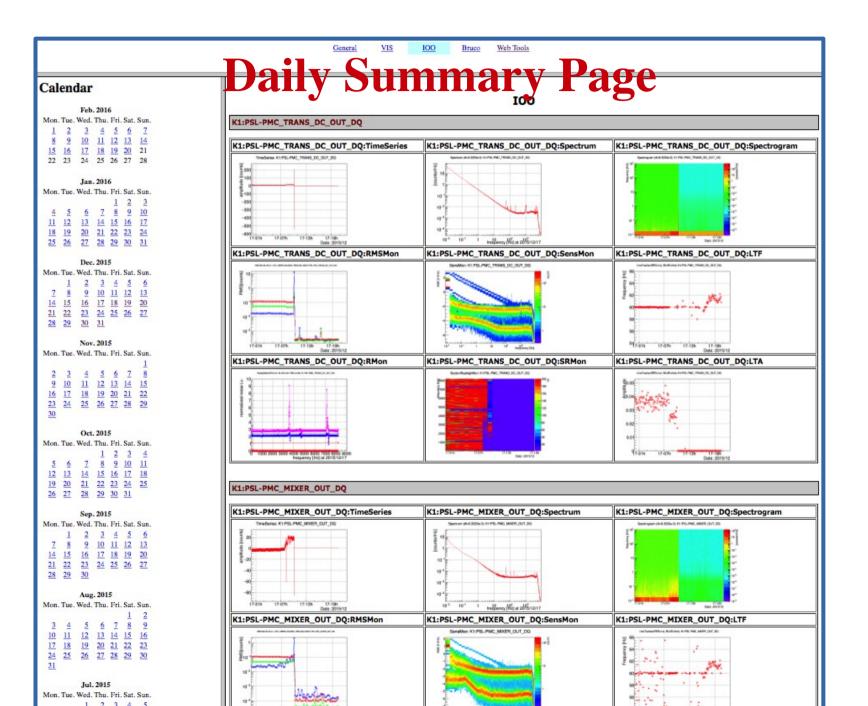

- Environmental monitor sensors with GIF
- Environment and Instrument monitor
- Development of characterization system

## **Preparing Environmental Sensors**

#### With GIF

- Hygrometer, thermometer, barometer are tested at the center area of KAGRA now.
- Seismometers, accelerometers are waiting for installation. (Feb ~ earlyMarch)
- Magnetometers will be introduced in the middle of this March.
- Slow data acquisition system will be set up ~early this March.

## **Preparation of monitoring system**

#### **Web-Based Tools**

#### **Detchar software**

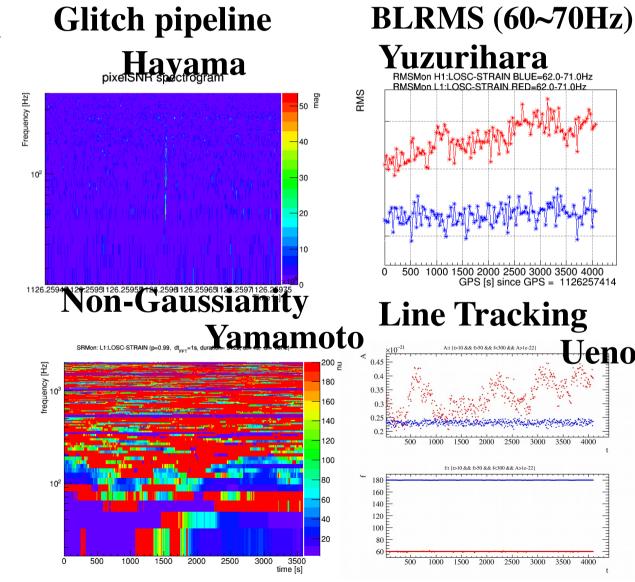

# **Example : GW150914**

Data Characterization around GW150914 http://seikai.hep.osaka-cu.ac.jp/~chino/GW150914/characterizeGW150914.html

Yuzurihara, Yamamoto

Ueno

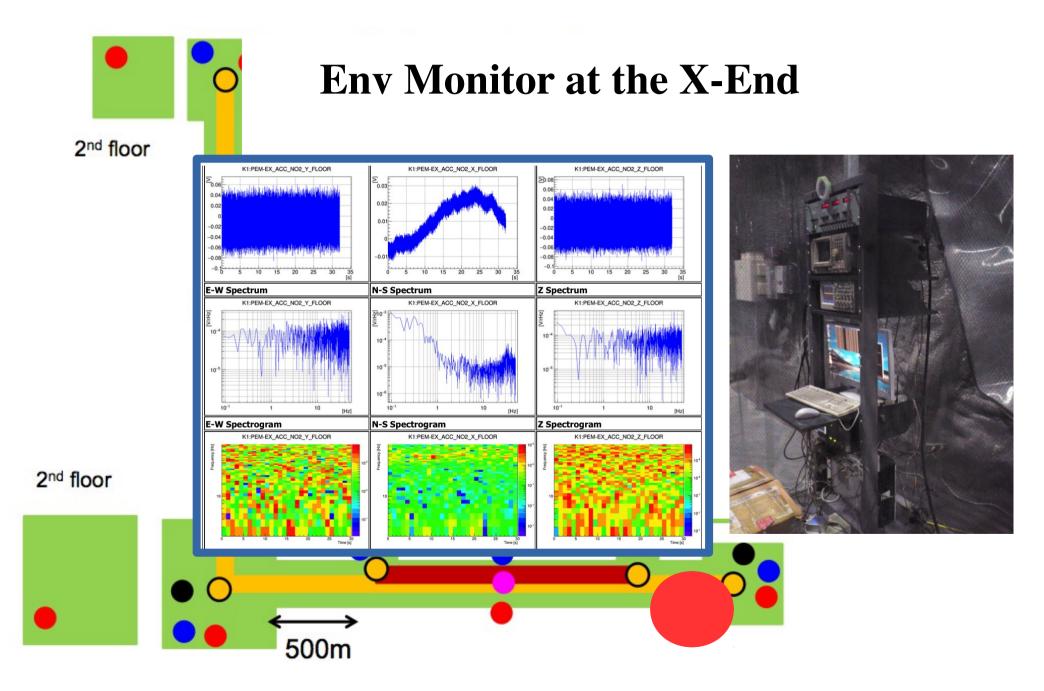

- Seen the signal clearly
- Amp. of Power line(60Hz) fluctuated ~+-5E-21
- Amp. of 500Hz line decreasing
- >100Hz, Gaussianity pretty good
- <100Hz, non-Gaussian
- 516Gz line: strange behavior.

## **Towards bKAGRA**

- Addition of Guardian info to the webpage(also for iKAGRA)
- Initial PEM plan will be finished in ~ this summer.
- Measurement of the magnetic field around mirrors
- Development of PEM injection system
- Channel selection to monitor
  - With Subsystems
  - With PEM injection study(2016-2017)

### **Real-time environment monitor**

## Network
