

***Proposal for organizing
the VIS measurements***

Kiwamu Izumi
for VIS, CRY and commissioning groups

Motivations

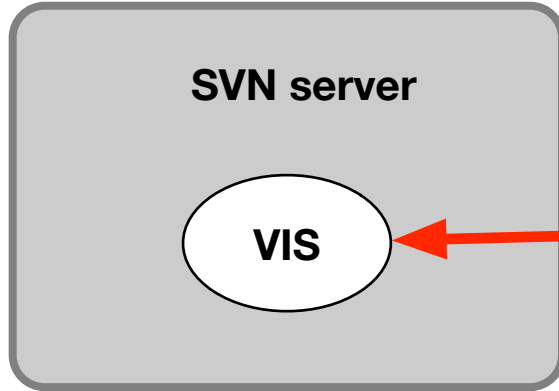

- ✓ **It is time to organize all the measurement data and templates related to the VIS and CRY (e.g., transfer functions, spectra and etc.)**
- ✓ **Currently none of them have regular back-up or sub-version control.**
- ✓ **It is often desired to quickly open some measurement templates.**

Proposal(s)

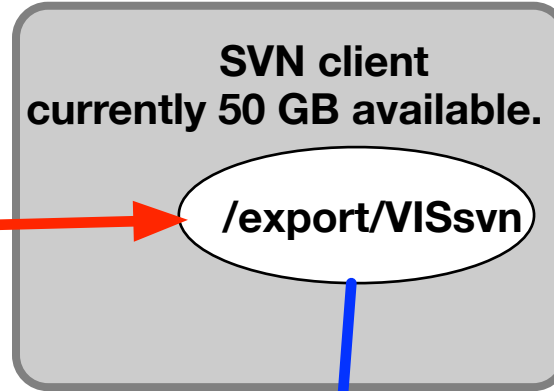

- ✓ **Store all the relevant diaggui templates and data into **SVN**.**
- ✓ **The SVN must have **reasonably organized directory trees**.**

SVN configuration

granite (at Hongo)

k1nfs0 (at Kamioka)

sync

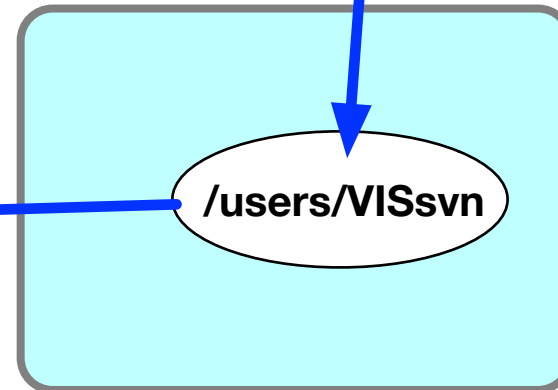

mount

users

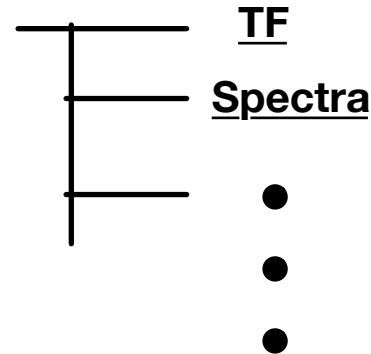

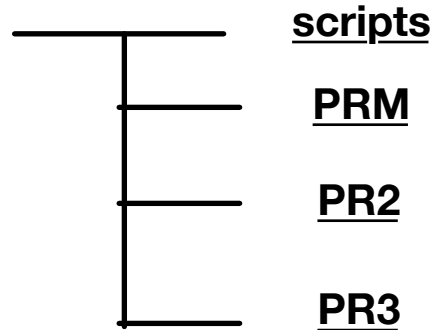

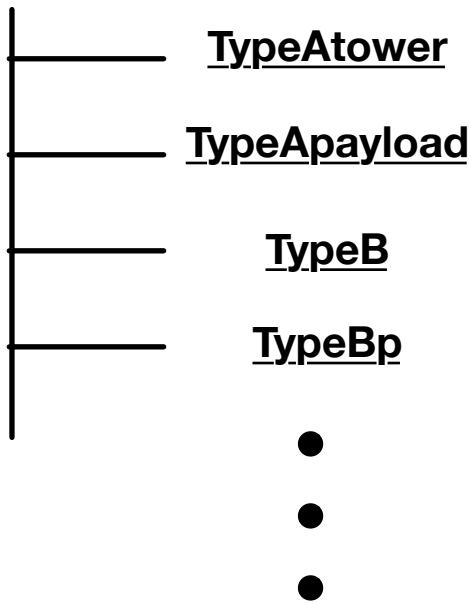

workstations (at Kamioka)

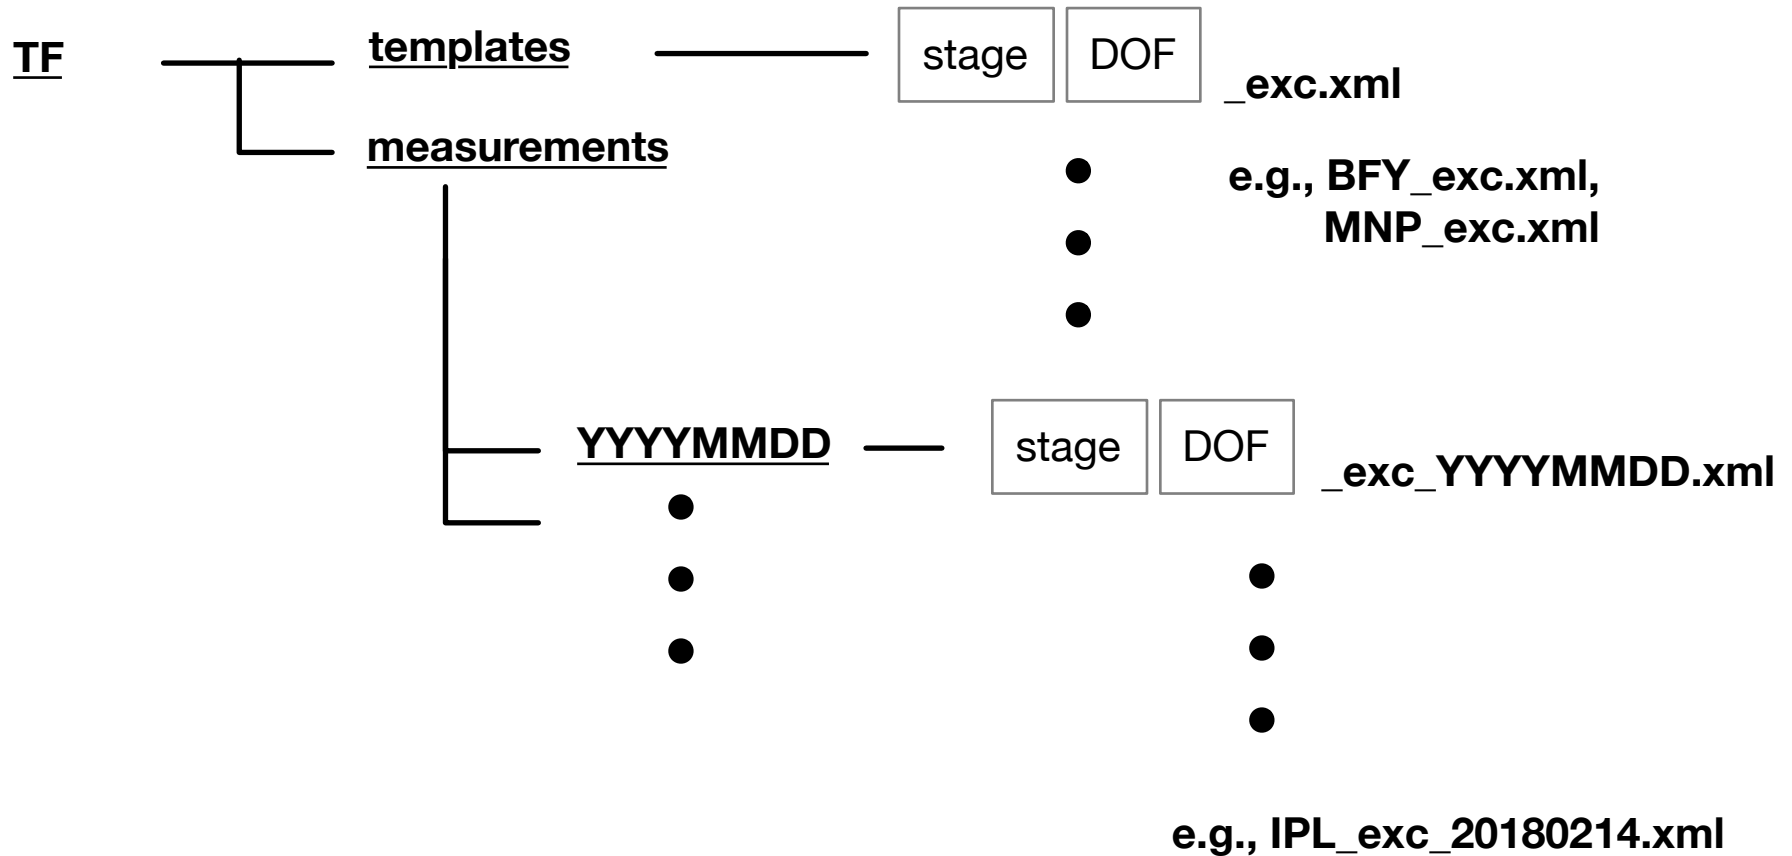

Proposed Directory Tree

VISsvn

Naming conversion

Please help us out

**by sending comments, questions,
objections and whatever you have in
mind.**

Thank you!
