

Request for modifying circuits

Date: 2018/June/19

JGWDoc No.: T1808397-v1

• Subgroup name : VIS/CRY/MIF

• Applicant name : Kiwamu Izumi

• Name of the circuit : 4 ch satellite Amp Board (JGW-D1503499-v2)

• Explanation of function of this circuit:

This request is NOT for production, but for modification!

As described in G1808352-v2, an additional capacitor of 100 nF (10% precision or better) needs to be staffed on ALL the satellite amplifier boards. Also, the reasoning for choosing a 10% precision is summarized in JGW-T1808388-v1.

• Necessary quantity : 45 (36 units + 9 spare units)

• Delivery date you hope : 7 units within a month or two (by the end of August. 2018)

(CRY- ETMX qty.3, VIS-PR2, PRM qty.4)

: 9 units by the end of September/October in 2018

(CRY-ITMX qty.3, VIS-SRM, SR2, SR3 qty.6)

: The rest of units within 9 months (by the end of March.2019)
